

Update to Frontier Phone Number and Links

These communication methods supersede those given in previous updates

Residents are encouraged to check with Frontier and see if the company has your physical address, phone number and email address – or other way to get in touch with you. If they do not, you can sign up for a notification when it becomes available for your location. You are able to check via the following options

Online:

[Find Frontier Availability | Internet Service Provider](#)

If this link does not work, please click the following or copy it into your browser

<https://frontier.com/local>

[Fiber Expansion - Check Availability or Nominate Area | Frontier](#)

If this link does not work, please click the following or copy it into your browser

<https://frontier.com/why-frontier/why-fiber-internet/fiber-expansion>

NOTE: Both links do essentially the same thing. They allow you to make sure that Frontier has your address on file and / or register with them

Phone Number:

If you have trouble online, don't have good access to internet, or just want to speak to a human, please call the following number:

844-819-9903

If you are currently a Frontier customer, it is important to note:

Frontier told the Technology Committee that they expect to **turn off** the copper line telephone service around 6 months after the **entire** project is completed (this means after everyone who wants fiber is hooked up): expected timeframe - August 2025.

Date of Update: May 10, 2024
